

Our mission

To save our wildlife for the future.

Our purpose

Our wildlife is disappearing. Almost two thirds of species in the UK have declined in the past 50 years. There's nothing natural or inevitable about this. It can be stopped. And we can all play a part in this. That's why People's Trust for Endangered Species exists and you can help us.

Scientific research

Conserving endangered species and the places they live is a huge task. To make a long term impact we must make our limited resources work as hard as possible. We use scientific evidence to judge where action is most needed and where we will have the greatest impact.

Conservation action

We work with landowners, local communities, scientists and the public to take swift and sustainable action before it's too late. From hedgehogs and stag beetles in our gardens, to lions and wild dogs on the African plains, we work with passion to save them all.

Educating & inspiring

We can save our wildlife, but we can't do it alone. We use our expertise and experience to inspire thousands of volunteers to monitor British wildlife and improve their surroundings for nature.
