- dating enclosure between 1791 and 1810
- bank associated with track
- lost ditch
- location of lost feature, from map or slight evidence
- coloured with medieval and early modern
- peril
- lost ditch (line = ditch & dash = bank, length of dash indicates relative width and density of the relative heights)
- way outting bank
- location of lost feature, from map or slight evidence
- described in text
- not associated with medieval and early modern
- peril, probably mainly perhistoric
- lost ditch (all wide and eroded)
- rooily lynchets
- way
- lines
- cliff hollow (regular with no visible entrances)
- hollow with tipping
- of unclear origin (smooth regular centre)
- possible entrance
- worked pile (irregular outline and edge with an entrance)
- 3 or 4 stages
- tree (mapped location)
- tree (indicative of line of trees)
- spice stool or stub (a tree cut as part of a hedge leaving a short trunk)
- scored in text
